# Specification Information

**Dispensing:** This product dispenses tissues manually through the center of the unit. The dispenser is also universal; meaning, the unit is non-proprietary and dispenses paper from standard commercial paper producers. This allows the end user to avoid getting locked into paper supply contracts and should save them money on their janitorial supplies. To load this product, first slide the front of the unit upward. Once the front of the unit is detached from the body, place desired tissues in the unit. After the dispenser has been replenished, return the front of the unit to the body.

**Capacity:**

- This dispenser accepts all standard facial tissues

**Materials:**

- Front: Face plate manufactured from 20 gauge steel with polished chrome finish
- Back: Recessed body is die formed from 20 gauge corrosion resistant galvanized steel

**Product Dimensions:**

- 30.2cm W x 16.3cm H x 5.6cm D (11.9" W x 6.4" H x 2.2" D)

**Product Weight:**

- 0.8 kg (1.75 lbs)

**Installation Guidelines:** This dispenser comes with two standard combination screws. Provide wall opening 28.6cm W x 13.4cm H x 5.7cm D (11- $\frac{1}{4}$ " W x 5- $\frac{1}{4}$ " H x 2- $\frac{1}{4}$ " D). Secure recessed body to wall using mounting screws provided. Please note that it is recommended that all installations be conducted by a qualified tradesperson. Please read and follow any additional installation guidelines provided with the products.

**Maintenance:** Normal preventative maintenance and cleaning will keep Frost products functioning properly and may extend normal product life. Products should be wiped down with a damp soft cloth periodically. Approved stainless steel cleaner may be used to clean scuffs or fingerprints on stainless surfaces. Do not use harsh detergents or chemical cleaners. For stainless steel please do not spray with any product containing bleach, acids, or chlorides, which can be found in many cleaning products such as toilet bowl cleaners. Use of these cleaning solutions may cause discoloration and if used for prolonged periods of time they can eat away at points in the stainless steel. If discoloration occurs, the use of an approved stainless steel cleaner and a firmer scrub pad, such as a Scotch Brite Pad #7447, may remove the markings. Wipe away any debris from the area and gently rub with the pad. Then spray the area with a stainless steel cleaner/polish and rinse and dry. Always wipe with the grain direction for stainless steel products. If a cleaning agent has begun to eat away at the steel on a unit then the unit will likely need to be replaced. The stainless steel that Frost Products uses is of high quality and stainless steel is resistant to rust. However, discoloration that appears to be rust can be caused by cleaning solutions and soaps mentioned above. It is important to discontinue use of any cleaning agent or soap if discoloration begins to occur. Clean off the discoloration as quickly as possible to avoid any permanent damage to the unit. Maintenance staff should be taught how to recognize the signs that they are not using the appropriate cleaning products and how to correctly maintain stainless steel items.

**Warranty:**

If any product or part proves to be defective within 12 months from date of shipment from the factory it will be repaired or replaced without any charge including freight costs when authorized. Costs resulting from the installation or removal of defective products are not covered under this warranty. Discoloration to stainless steel parts resulting from exposure to harsh environmental and / or chemicals are not considered to be defects in workmanship or material and are not covered under warranty.
