

Specification Information

Product Code: 976

Product Name: Corner Mounted Shower Seat

Individual Carton UPC: 624622976002

Individual Carton Shipping Dimensions: 68.9cm W x 6.4cm H x 43.2cm D (27" W x 2.5" H x 17" D)

Individual Carton Shipping Weight: 6.4kg (14 lbs)

Site Location: Frost's 976 corner mounted shower seat provides maximum space utilization. All corners are radiused and ground smooth for safety and ease of cleaning. Extra return flange at front edge provides extra rigidity and comfort when lifting or lowering seat. Typically, these units are used in schools/universities, hospitals, and retirement and nursing home communities. The durable construction, large weight capacity, and barrier free design make this unit a popular seat.

Features:

- Compact flip up shower seat retracts out of way when not in use
- Can be left or right mounted as required
- Easy to clean and maintain
- Secure and sturdy

Capacity:

- Will sustain a load of 300lbs if properly installed

Materials:

- All stainless steel, one piece construction
- Seat: 16 gauge stainless steel type 304 with #4 brushed finish

- Down: 40.4cm W x 5.1cm H x 40.4cm D (15.9" W x 2" H x 15.9" D)
- Up: 40.4cm W x 38.4cm H x 5.1cm D (15.9" W x 15.1" H x 2" D)

Product Weight:

- 5.4kg (12 lbs)

Installation Guidelines: Mount seat 17"-20" from floor. Mount clip as close to the corner as possible. Shower seats can only support the loads intended with proper use of anchors and in wall backing. Ensure wall structure meets local building codes and the architects specification. Shower seat will sustain a load of 300 lbs. All shower seats must be installed by qualified trades persons. Installers must consult and comply with local building codes. Mounting hardware and other systems to be determined by contractor and installer pending specific structure, design, and conditions. All installations must be fully inspected and approved by property owners and maintenance personnel prior to seat being put into use. Failure to comply to proper installation procedure will void warranty and may result in malfunctioning or injury.

Maintenance: Normal preventative maintenance and cleaning will keep Frost products functioning properly and may extend normal product life. Products should be wiped down with a damp soft cloth periodically. Approved stainless steel cleaner may be used to clean scuffs or fingerprints on stainless surfaces. Do not use harsh detergents or chemical cleaners. For stainless steel please do not spray with any product containing bleach, acids, or chlorides, which can be found in many cleaning products such as toilet bowl cleaners. Use of these cleaning solutions may cause discolouration and if used for prolonged periods of time they can eat away at points in the stainless steel. If discolouration occurs, the use of an approved stainless steel cleaner and a firmer scrub pad, such as a Scotch Brite Pad #7447, may remove the markings. Wipe away any debris from the area and gently rub with the pad. Then spray the area with a stainless steel cleaner/polish and rinse and dry. Always wipe with the grain direction for stainless steel products. If a cleaning agent has begun to eat away at the steel on a unit then the unit will likely need to be replaced. The stainless steel that Frost Products uses is of high quality and stainless steel is resistant to rust. However, discolouration that appears to be rust can be caused by cleaning solutions and soaps mentioned above. It is important to discontinue use of any cleaning agent or soap if discolouration begins to occur. Clean off the discolouration as quickly as possible to avoid any permanent damage to the unit. Maintenance staff should be taught how to recognize the signs that they are not using the appropriate cleaning products and how to correctly maintain stainless steel items.

Warranty: If any product or part proves to be defective within 12 months from date of shipment from the factory it will be repaired or replaced without any charge including freight costs when authorized. Costs resulting from the installation or removal of defective products are not covered under this warranty. Discolouration to stainless steel parts resulting from exposure to harsh environmental and / or chemicals are not considered to be defects in workmanship or material and are not covered under warranty.
